

Anti-Fraud tools are only as good as the data behind them

Bad actors perpetually **adopt** to obsolete data by:

- spoofing **devices**
- breaching **databases**
- using **residential proxies**
- selling **account info**
- utilizing **bots**
- creating **temp emails**
- purchasing **data**
- using **VPNs**

in other words...

DATA is like <fish>
- the older it is, the more it smells

IPQS' data is different. It evolves to keep up.

Trillions upon trillions of **IP addresses** scanned daily

Hundreds of millions **transactions** scored every day on every continent

Thousands of users syncing data in the largest **global threat and abuse network**

An army of bots scraping every corner of the **dark web**

10,000+ active **honeypot sites** targeting bots and bad actors

Data synced with leading VPN's, mobile carriers, and email providers

All behind every tool in **IPQS Anti-Fraud Suite**

PLUG IN

Easily connect **your website or mobile app** to:

- IP/proxy & VPN** detection
- Email** validation
- Phone** detection
- Device** fingerprinting
- Malicious **URL** scanner
- Bot** identification
